## Complete Project

1. Provide a link to GitHub repository for TAs to view the code. (5 points)

Links to Github are posted below:

[https://github.com/ShaneMeghani/Software\\_Design\\_Project.git](https://github.com/ShaneMeghani/Software_Design_Project.git)

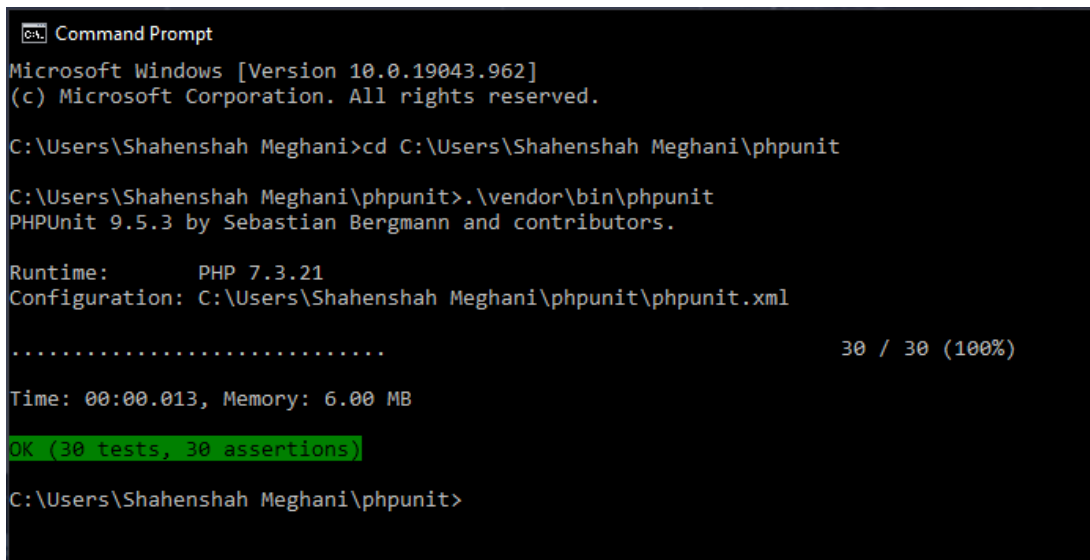

[https://github.com/ShaneMeghani/Software\\_Design\\_Project/tree/main/Complete%20Project%20with%20Demo](https://github.com/ShaneMeghani/Software_Design_Project/tree/main/Complete%20Project%20with%20Demo)

- Here you will find our HTML/CSS, PHP, Database, and Unit Testing code.

- You will also find our demo outline here as well, please look over that for additional project information.

- Our Final Project is located within the directory called “Complete Project with Demo”.

2. Rerun the code coverage report. Code coverage must be above 80%. (2 points)

```
Command Prompt
Microsoft Windows [Version 10.0.19043.962]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Shahenshah Meghani>cd C:\Users\Shahenshah Meghani\phpunit

C:\Users\Shahenshah Meghani\phpunit>.\vendor\bin\phpunit
PHPUnit 9.5.3 by Sebastian Bergmann and contributors.

Runtime:       PHP 7.3.21
Configuration: C:\Users\Shahenshah Meghani\phpunit\phpunit.xml

.....                                     30 / 30 (100%)

Time: 00:00.013, Memory: 6.00 MB

OK (30 tests, 30 assertions)

C:\Users\Shahenshah Meghani\phpunit>
```

- All Unit Tests and Test Classes are located within github in our “Unit Testing” Folder.

- We used PHPUnit and Xdebug to run our tests.

- Please check our outline for more information, which is also located on our github.

3. Demo prior to project due date. (3 points)

- Our Demo Date is confirmed for April 27th between 1:00 - 1:20 PM with Wesley, Amanveer.

4. **IMPORTANT:** list who did what within the group. TAs should be able to validate in GitHub, otherwise team members who didn't contribute will receive a ZERO.

Andrew Nguyen - Help Designed DB, Make Unit Tests, Made PHP Code, and Made HTML Code.

Shahenshah Meghani - Help Designed DB, Integrated SQL into PHP Code, Made PHP Code, and Made HTML Code.

Syed Aziz - Help Integrate SQL into PHP Code, Make Unit Tests, Made CSS Code, and Helped Set Up Our PHPUnit Testing environment.

**\*Note: All members contributed to every part of this project. Work distribution above was based on who was writing code, designing the DB, or making Unit Tests at the time. We streamed each other's screen while working on this project, and there were no complaints with work distribution.**
